?	Show keyboard shortcuts
k	Highlight previous file
j	Highlight next file
space	Check highlighted file
o	View highlighted file

Useful Tips and Tricks

1. Extra Storage for Free:

Get 250MB of extra space for each friend you invite (up to 8GB) and even more for reporting bugs. (www.dropbox.com/referrals)

2. Share a Folder Safely:

In Dropbox account click Share a Folder. Share an existing folder or create a new one.

3. Recover Deleted Files:

Click Show Deleted Files button and select Undelete.

4. Share Photo Galleries:

Create a folder under Dropbox/Photos, put some images there, right-click on the gallery folder, copy public gallery link and share it with friends.

5. Move Dropbox Outside of Documents Folder

Right click on the Dropbox icon in desktop tray and select Preferences. Click on Move and select the new location of your Dropbox folder.

6. Security Camera:

Setup your webcam to save captures to a Dropbox folder and view them with a mobile device

7. Start a Torrent download remotely

Set your torrent client on home PC to watch specific folder in Dropbox for new torrents. Download a new .torrent file (regardless which PC you're on) and save it to that folder. Your torrent client will start the download shortly after the file appears in that designated directory .

8. Make Dropbox your default documents folder

Move your My Documents folder to Dropbox and you'll always stay up to date with your docs.

* **on Mac** - Open Terminal and go to Dropbox directory (type: `cd Dropbox`). Then create a symbolic link to Documents folder (type: `ln -s ~/Documents/Documents`).

* **on Windows** - Open Terminal and navigate to your Dropbox directory (type: `cd Dropbox`). Now create a symbolic link to your Documents folder (type: `ln -s ~/Documents/ Documents`)

Tools and Plugins

1. Reach Files from Mobile:

Download and install Dropbox app to your mobile and you'll always have access to your files.

- www.dropbox.com/anywhere (iPad, iPhone, Android and Blackberry)

- <http://store.ovi.com/content/54851> (for Nokia)

2. Dropitto.me

Let others safely upload files to your Dropbox (password protected)

3. SendToDropbox.com

Easily Send email attachments to your Dropbox!

4. Droptun.es: Listen To Your Music from Dropbox

Put your music files in a separate folder under your Dropbox directory. Then go to <https://droptun.es/login> from any computer and log in to your Dropbox account. Navigate to the folder with music.
