<b>Gmail Attachments</b>	Save Gmail attachments directly to Google
To Drive (Chrome) http://bit.ly/J6isN9	Drive from the attachment list itself with a newly added Save To Drive link.

## Useful tips and tricks

1. Use the "Send To" from	Copy this line: <b>%APPDATA%/Microsoft/Windows/SendTo</b> , paste it into the Windows
right-click Menu (Win):	Explorer's <u>address bar</u> , hit <b>Enter</b> , right-click the Google Drive folder in your favorites,
,	hold down the right mouse button, and drag and drop it to your <b>Send To</b> folder.
	When a menu appears, select "Copy Here."

2. Make Google Drive your default documents folder:

Move your My Documents folder to Google Drive and you'll always stay up to date with your docs.

Open **Terminal** (search for it in Spotlight) and type **cd Users/<u>yourusername</u>/Google\Drive**. Hit Enter, then type In -s ~/Documents /Documents. Hit Enter.

Right click on "My Documents" folder and select the Location tab. Next, click Move... and browse to the location of your Google Drive directory.

3. Manage Deleted Files:

All deleted files are stored in **Trash**. To manage these files, click on **More** in the main menu and click Trash.

4. Restore previous versions (on-site only):

Right-click on a file, click "Manage Revisions".

5. Make use of Google Apps:

Enhance your Google Drive experience with various apps at http://bit.ly/O8ewQB

# **Must-have Google Apps**
