

Total Commander Button Bar Parameters

?	As the first parameter causes a Dialog box to be displayed before starting the program, containing the following parameters. You can change the parameters before starting the program. You can even prevent the program's execution.
%P	Causes the source path to be inserted into the command line, including a backslash (\) at the end.
%N	Places the filename under the cursor into the command line.
%T	Inserts the current target path. Especially useful for packers.
%M	Places the current filename in the target directory into the command line.
%O	Places the current filename without extension into the command line.
%E	Places the current extension (without leading period) into the command line. <i>Note: %N and %M insert the long name, while %n and %m insert the DOS alias name (8.3). %P and %T insert the long path name, and %p and %t the short path name. (Same for %o and %e)</i>
%%	Inserts the percent sign.
%L	Long file names including the complete path, e.g. c:\Program Files\Long name.exe
%l (lowercase L)	Short file names including the complete path, e.g. C:\PROGRA~1\LONGNA~1.EXE
%F	Long file names without path, e.g. Long name.exe
%f	Short file names without path, e.g. LONGNA~1.EXE
%D	Short file names including the complete path, but using the DOS character set for accents.
%d	Short file names without path, but using the DOS character set for accents.

These are pretty helpful and took me a while to find. I figured someone may need them, even if it is one day in the future.

How-to use Total Commander button bar parameters

Step 1.
 | Create a new button on the button bar

Step 2.
 | Using the menu, insert the path to the ImgBurn executable

Step 3.
 | Insert the string below as the value in the Parameters box:

```
This will feed a file to the standard build menu
?/MODE BUILD /BUILDINPUTMODE STANDARD
/BUILDOUTPUTMODE DEVICE /SRCLIST "%P%N"
/FILESYSTEM "UDF" /UDFREVISION "1.02" /NOIMA
GEDetails /ROOTFOLDER YES /NOSAVESE
TTINGS /VERIFY /VOLUMELABEL "%O"
```

You can use the cheats above to figure out what is going on in this string.

Step 4.
 | Choose the icon for the button and press ok.
